Profile Summary

I'm a Junior Fullstack Developer with a strong focus on frontend work. I love using CSS to make interfaces look cool, with fun animations that enhance user experiences. While I build backends using Node.js and Spring Boot, my true passion is creating clean, easy-to-use frontends with React and Angular. I also work with PostgreSQL and RESTful APIs, ensuring my apps perform well on all devices and within agile teams.

Key Skills

Programming & Web Development

-  Python
-  JavaScript
-  HTML & CSS
-  React
-  Angular

Backend & Databases

-  Node.js & Express.js
-  PostgreSQL
